WELCOME MESSAGE

Welcome to H-LEMP AFRICA 2026

Africa's healthcare sector stands at a defining moment. The future of healthcare delivery requires visionary leadership, innovative entrepreneurship and world-class management systems.

The H-LEMP addresses a critical gap within the healthcare system: while many healthcare practitioners possess strong clinical expertise, they are often not adequately trained in leadership, management, entrepreneurship, and innovation—the essential competencies required to truly transform healthcare systems.

These gaps create accidental leaders, and accidental leaders often produce accidental results. This is a major contributor to inefficient healthcare delivery, poor health outcomes, slow system transformation, and weak health sector performance across many African countries.

By creating a system where leadership, management, entrepreneurial, and innovation capabilities among healthcare professionals flourishes, H-LEMP Africa seeks to drive sustainable improvements and transformational change throughout the healthcare sector.

This first-of-its-kind Conference in Africa will convene healthcare leaders, policymakers, investors, HMOs, leaders in academia, innovators and development partners from across Africa to institutionalise these skills and bridge the gap towards transforming Healthcare.

WHY H-LEMP AFRICA?

LEADERSHIP EXCELLENCE

Developing
transformational
healthcare
leaders
